97	ALTERNATE MATERIAL FEE	_____	Hour(s)

PROJECT INFORMATION

LARGEST COLD WATER PIPE	_____	Inches
BUILDING SEWER	_____	Inches
LARGEST GAS PIPE	_____	Inches

NEW SEWER BACKWATER VALVE REQUIREMENT

Effective immediately no plumbing or sewer permit shall be issued for any plumbing work unless a backwater valve protection determination form is filled out and signed by the applicant. The signed copy must be attached to the permit and electronically filed under the permit record. If a backwater valve is required, the plumbing permit application shall include a backwater valve.

BACKWATER VALVE PROTECTION DETERMINATION

Job Address: _____, La Mirada, California

Section 710.1 of the Los Angeles County Plumbing Code requires that drainage piping serving Plumbing fixtures installed on a floor level that is below the elevation of the next upstream manhole cover of the public or private main sewer serving such drainage piping shall be protected from backflow of sewage by installing an approved type **backwater valve**.

It is the responsibility of the permittee to determine whether the relative elevations of the floor with plumbing fixtures and sewer manhole cover at this job site are such that a **backwater valve** is required.

I, _____, the LICENSED CONTRACTOR / OWNER
(check one) have reviewed the conditions at the job site and have determined that:

- A **backwater valve** is required and is installed.
- No **backwater valve** is required. Plumbing fixtures are installed on a floor level that is not below the elevation of the next upstream manhole cover.
